

NexaFlow AI

Intelligent Workflow Automation for Enterprise

Series A • \$12M Raise • Q1 2024

Enterprises Are Drowning in Manual Workf

\$4.5T

Lost annually in productivity due to manual, repetitive tasks across enterprise teams

68%

Of employees spend 3+ hours/day on work that could be automated with the right tools

47 Apps

Average number of disconnected SaaS tools per enterprise — zero intelligent orchestration

Legacy RPA tools are brittle, expensive, and require specialized engineers to maintain.

NexaFlow: AI-Native Workflow Orchestration

A no-code platform that lets any team automate complex, cross-app workflows using natural language

■ Natural Language Builder

Describe workflows in plain English — NexaFlow generates, deploys, and monitors them automatically.

■ Universal Integrations

Pre-built connectors for 300+ enterprise apps: Salesforce, SAP, Workday, Jira, and more.

■ Self-Healing Automation

AI detects and fixes broken workflows in real time — no manual intervention required.

■ Insights Dashboard

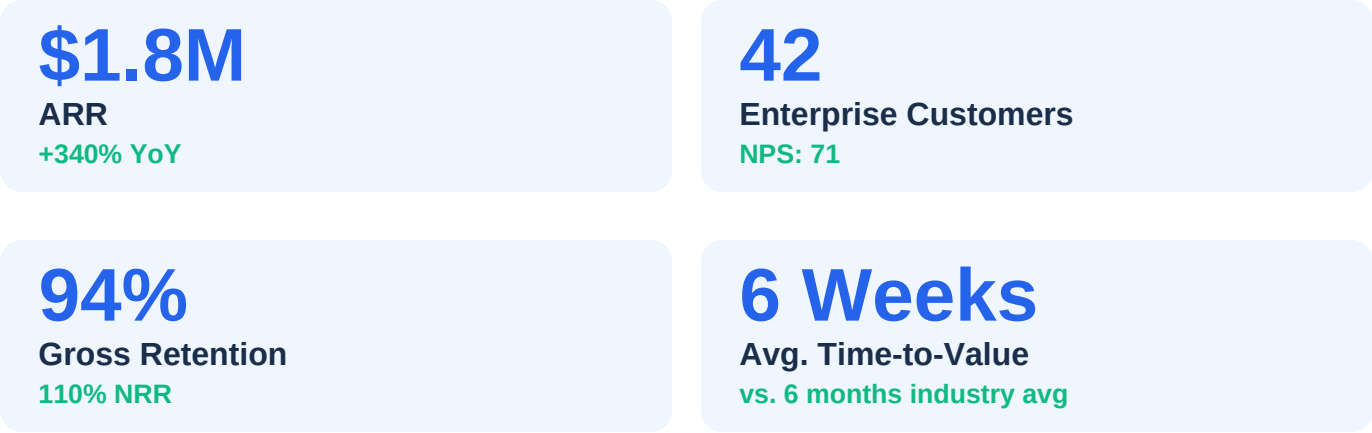

Real-time analytics on automation ROI, bottlenecks, and savings — boardroom-ready reports.

A \$48B and Growing Market
