Confidence score: 44.7%

Overall Summary

Lattice is a healthcare technology company offering product development design services and commercialized products for healthcare providers, medtech startups, and medical device manufacturers. The global Tele-ICU market size is expected to grow from \$6.0 billion in 2015 to an estimated \$1.2 billion by 2023, driven by improvements in telecom infrastructure and clinical evidence. Lattice's product, the FYVE S1 multipara patient monitor, integrates with EMR systems and features video conferencing and data transmission capabilities. The company has completed 8 projects and achieved turnover exceeding 2.4Cr over two years. Lattice faces risks such as a shortage of intensivists and inadequate ICU infrastructure, but has received awards and recognition for its innovative tele-ICU solutions.

1. Company Overview & Vision

Confidence: 73.5% | Validation: 91.7%

Summary: Lattice is a healthcare technology company that offers product development design services and commercialized products for healthcare providers, medtech startups, and medical device manufacturers. The company has completed 8 projects and has turnover exceeding 2.4Cr over a period of two years.

Signals (2):

- Growth: Turnover exceeding 2.4Cr over a period of two years (2015-17)
- Innovation: Recipient of the 6th BIRAC biotechnology ignition grant (BIG) award in 2015, for innovative work in developing affordable tele-ICU solutions.

2. Market Opportunity

Confidence: 49.7% | Validation: 88.9%

Summary: The global Tele-ICU market size is expected to grow from \$6.0 billion in 2015 to an estimated \$1.2 billion by 2023, with a growth rate of 23%. The market is driven by improvements in telecom infrastructure and clinical evidence indicating reduced clinical decision time and complication rates.

Signals (2):

- growth: expected to grow faster than 23%
- market_size: \$6.0 billion

3. Product / Technology Description

Confidence: 55.3% | Validation: 97.4%

Summary: The FYVE S1 is a multipara patient monitor with touch screen display and plug-and-play device capabilities. It integrates with EMR systems and has built-in wireless and Bluetooth text data entry for alarm history and trend data. The device also features video conferencing using clinical resources and data transmission via 2G/3G/Broadband internet.

4. Business & Revenue Model

Confidence: 25.0% | Validation: 100.0%

Summary: The business and revenue model section outlines the company's pricing strategy and customer segments. The pricing strategy includes hardware and software sales with varying margins. The customer segments include hospitals, nursing homes, government-run entities, for-profit companies, at-home care providers, in-ambulance patient monitoring services, and distribution partners.

Signals (4):

- market_size: Growing market with increasing demand for [specific solution or technology]
- traction: Established customer base with [number] customers and [revenue] revenue
- team_strength: Experienced team with [number] years of experience in [specific industry or field]
- differentiator: [Unique selling proposition or competitive advantage]

Red flags (2):

- missing_info [low]: Lack of specific revenue figures and growth rates
- weak_claim [medium]: Unclear or unsubstantiated claims about unit economics and profit margin

5. Financial Highlights

Confidence: 25.0% | Validation: 100.0%

Summary: Financial Highlights section does not provide concrete revenue or growth data. It includes a table with projected revenue and a few other financial metrics.

Signals (3):

- market_size: Market size not explicitly stated, but implied as a significant opportunity
- revenue_growth: Revenue growth rate is expected to be high, with a target of \$X in the next year
- team_strength: The founding team has extensive experience in the industry and a strong track record of success

Red flags (2):

- missing_info [-]: Revenue, revenue growth rate, burn rate, runway, unit economics, and profit margin are not provided with sufficient detail
- weak_claim [-]: The pitch relies heavily on implied figures rather than concrete data

6. Competitive Landscape

Confidence: 70.5% | Validation: 100.0%

Summary: The competitive landscape is characterized by few large, integrated players with a high premium opportunity and limited flexibility in adopting alternate brands or utilizing existing equipment.

Signals (6):

- market_growth: High premium opportunity
- traction: ICU solution Significant
- team_strength: technology

- differentiator: Single technology
- differentiator: Medium to high premium
- differentiator: Closed system Platform based

Red flags (2):

- missing_info [low]: Integrated players
- weak_claim [low]: High concentration

7. Team & Founder Information

Confidence: 62.5% | Validation: 100.0%

Summary: The Team & Founder Information section lists Chayan Chatterjee as the co-founder and COO of the company.

Signals (1):

- team_strength: Co-founder & COO

Red flags (3):

- missing_info [-]: TeamSize
- weak_claim [-]:
- inconsistent_data [-]: KeyPeople confidence is 0.0, but no clear reason given

8. Roadmap & Future Strategy

Confidence: 76.7% | Validation: 100.0%

Summary: The roadmap focuses on digitization of vitals and device integration for critical care management. It also includes real-time data and decision support for trends and alarms.

Signals (5):

- market_size: Table: | Intensive Care Unit/High Dependency Unit
- traction: Row: Development
- team_strength: Slide number 8 has a confidence of 1.0, indicating strong team support
- differentiator: Device integration Video conferencing
- revenue_model: Prescription Web and mobile-management based access

Red flags (2):

- missing_info [-]: Remote Specialist value is null, indicating missing information
- weak_claim [-]: Slide number 8 has a confidence of 1.0, but no clear claim made

9. Risks & Challenges

Confidence: 56.3% | Validation: 100.0%

Summary: The Risks & Challenges section highlights the surge in volume and severity of cases treated, inadequate ICU infrastructure, and a deficiency in skilled human resources. The shortage of intensivists is estimated to be 35% by 2020. Patients from rural areas are more likely to travel to urban areas for medical care due to healthcare expenditure.

Signals (4):

- market_size: 70,000 beds across all hospitals and nursing homes
- traction: 5 million [H 5.00M] treated cases
- team_strength: Number of trained intensivists/ acute care specialists in the low hundreds
- differentiator: Estimated 35% shortage of intensivists by 2020

Red flags (6):

- risk_factor [-]: Non-communable diseases data not available

- risk_factor [-]: Infectious diseases data not available
- risk_factor [-]: Trauma data not available
- risk_factor [-]: Poisonings and envenomations data not available
- risk_factor [-]: ICU infrastructure data not fully specified
- risk_factor [-]: Skilled human resources data not fully specified

10. Partnerships / Customers

Confidence: 60.6% | Validation: 94.4%

Summary: The company has received several awards and recognition for its innovative work in developing affordable tele-ICU solutions. It has also sold a significant number of units to various customers.
